Aerosol Forum opens up to dispensing systems

The 5th edition of Aerosol Forum [<http://www.premiumbeautynews.com/The-future-of-aerosols,1668>] was held on the 8th and 9th March 2011, with nearly 800 participants from some twenty countries representing leading International brands and their aerosol, dispensing system, product, service and technology suppliers (40 exhibitors).

The 9th March in the morning, at the instigation of Isabelle Lepeltier, L'Oréal, a session was held on the development of aerosols for cosmetics. Isabelle Lepeltier and Philippe Barnouin chaired this session, with presentations by: Fareva, Precision, Lindal, ColepCCL, Mall+Hertan, Tubex, Stork Prints Austria, Boxal, ALBEA and Strate College.

« I am very pleased with this session on cosmetics, which is the leading sector for the aerosol industry, with new challenges to take up in terms of innovation, the environment, etc. » said Isabelle Lepeltier.

To meet the expectations of experts in the field and changing demand, Aerosol Forum will become Aerosol & Dispensing Forum.

Aerosol & Dispensing Forum will be held on the 8th and 9th February 2012, in Paris, at the Espace Champerret, and will propose a panoramic view of aerosol and dispensing system technologies.

« Opening up to dispensing systems is an excellent opportunity for the aerosol industry and the organisation of both events at the same time will enable us to optimise our contacts, » stated Gilles Baudin, L'Oréal.
