

Some More Aerosol Facts:

## The aerosol industry and the nation's economic growth

- The U.S. aerosol industry has approximately 400 companies producing the components used to make aerosol products (e.g., valves, cans, propellants and other ingredients), formulating and marketing products in aerosol form, or contract filling aerosol products.
- CSPA estimates that approximately \$15 billion in annual revenue is generated from the sale of aerosol products nationwide.

## Aerosol products and the environment

- Steel aerosol cans contain an average of 25-33 percent recycled material. If the more than 3.6 billion aerosol products sold annually were all recycled when empty, that would produce enough steel for more than 160,000 automobiles. Most recycling programs today accept empty aerosol cans along with other recyclable packaging.
- Aerosol products reduce waste through their long product shelf life and minimum spillage.

For more information on aerosol products, visit [www.AboutAerosols.com](http://www.AboutAerosols.com).

Copies of the survey are available to CSPA members for \$95.00 and nonmembers for \$495.00. A limited number of reports from past years also are available. Order online under "publications orders" on the CSPA website at [www.cspa.org](http://www.cspa.org) or send a check or money order to CSPA at 900 17<sup>th</sup> Street N.W., Suite 300, Washington, DC 20006. ■

## Packaging Innovation Hub 2012, February 8<sup>th</sup> & 9<sup>th</sup>, Espace Champerret, Paris

Wednesday 8<sup>th</sup> and Thursday 9<sup>th</sup> February, 2012. Aerosol & Dispensing Forum and PCD (Perfumes, Cosmetics & Design) will be held simultaneously in Espace Champerret, Porte de Champerret, Paris.

Aerosol Forum becomes Aerosol & Dispensing Forum to meet the growing interest shown by attendees for dispensing technologies: spray, spray of liquid products, pastes and powders.

This is the opportunity to bring together all players in cosmetics, aerosols and dispensing technologies on a common platform, each event retaining its own identity.

Conferences program in progress:

## Aerosol & Dispensing Forum

Wednesday 8<sup>th</sup> February

- Health & Dispensing Systems
- Paris Aerosol & Dispensing Awards
- Paris Aerosol Restaurant
- Spray technology for cosmetics: recent progress

Thursday 9<sup>th</sup> February

- Innovation Workshop:
  - Electronic Spray
  - Which AIRLESS for what uses?
  - Triggers

Paris Aerosol Restaurant

Markets in development: food, technical and niches applications, etc.

## PCD

Wednesday 8<sup>th</sup> February

- Innovation Workshop:
  - "e@PCD" when electronics meet cosmetics
  - How to write effective patent suiting your goals?
- Lunch
- Perfumes: packaging innovations

Thursday 9<sup>th</sup> February

- Skin care and make up products: packaging innovations
- Lunch
- PCD Awards

The exhibition area, a genuine technological showcase, will bring together more than 120 exhibitors, major packaging suppliers (materials, transformers, artwork, dispensing, packaging, services and technologies providers). Over 2,000 packaging experts from 40 countries are expected to attend the next edition! ■
