

▶ ColepCCL is delighted to present... Its new acquisition: Czewo Full Filling Service GmbH

ColepCCL S.A will be exhibiting at the third Aerosol Forum on 10 and 11 March (stand E10/F09) and presenting Czewo Full Filling Service GmbH, an acquisition that was announced in June 2008 and finalised last January.

"The recent acquisition of Czewo Full Filling Service GmbH offers us greater possibilities and leaves us ideally positioned to better serve our markets in the future," says Jo Jackson, Marketing and Innovation Manager with ColepCCL. This is a consistent and symbolic acquisition that consolidates the group's position, values and ethics. ColepCCL is the largest European manufacturer of packaging for aerosols and liquids in the body care, health, beauty, and household product sectors. It is also an important supplier of tinsplate and plastic packaging.

Strategic geographical locations

This major European group has facilities in Germany, Poland, Spain and Great Britain. The plants operate therefore from strategic geographical areas. The fair will give ColepCCL the opportunity to present its expertise and technical capabilities. The designer Katia Gloeckler will be in attendance for a

conference on the role of design in the process of innovation.
Innovate and transmit

Innovation is both the foundation and objective of the group, which endeavours to offer increasingly creative goods and services to its customers. ColepCCL has its own innovation centre in Laupheim, in the south of Germany, and from here stem the company values conveyed by a workforce that is constantly striving to provide customers with added value.

What defines ColepCCL:

"ColepCCL is the leader in value creation as the company provides its customers, through innovation and technology targets, with product, production and packaging solutions, not forgetting — and this is essential for us — a contribution to environmental conservation." Jo Jackson, Marketing and Innovation Manager

Figures:

Turnover of €500 million
2,800 employees in Europe
11 strategic geographical areas 🌐
