

Garnier Fructis Bambu

During the Aerosol Forum in Paris on 10th and 11th March '09 a Boxal produced aerosol has been awarded with the 'Jury's Distinction Award'.

Boxal has worked closely with it's customer L'Oreal to come to the desired printing result for this design. By using it's newly developed Hi Def printing process, providing high definition printing on alu aerosols, Boxal has delivered an easthetically and technically attractive print result recognised by the Aerosol Forum Jury.

Boxal's Hi Def printing process enables printing of close to photo-realistic imagery on aluminium aerosols cans on it's total range of produced aerosols. ■
