

# AEROSOL FORUM

2009 MARCH 10 & 11

The 3<sup>rd</sup> edition of the Aerosol Forum located at the Cité des Sciences in Paris is very pleased to announce that the main focus of this edition will be Sustainability. Sustainable packaging is a key issue for the environment and one of the biggest challenges for the upcoming years. The first morning session of the conferences will be focused on the respect of the environment and the afternoon session will be dedicated to design, eco-design and new decorations techniques for Aerosol cans.

At Aerosol Forum we are very proud to welcome over 600 visitors representing the worldwide aerosol packaging groups: Packaging Innovation, Development and Purchasing, R&D and Marketing Managers will attend the conferences and the exhibition will gather their main suppliers of packaging (materials, TTS, processing, pre-press, dispensing systems, technologies and services).
